

SCANNA MAIL

Volume 1, Issue 3

New addition to the family- Scanmax 25

Spring 2001

We've recently made a new addition to our family of SCANMAX X-ray scanners.

The new SCANMAX 25 is a high capacity scanner that combines a compact physical size with a large parcel scanning facility .

The screening chamber can accept items up to 41 x 56 cm and with the door situated on the front rather than the side you can slide the unit neatly into the corner of the office or mail-room.

The SCANMAX 25 is equipped with its own wheeled base making it easy to move around. The monitor can either sit on top of the unit or on a separate desk-top.

As with all our SCANMAX models, the SCANMAX 25 comes in both black and white and colour versions.

All systems offer high resolution images and zoom whilst the COLORSCAN models highlight areas of different density in

separate colours.

Units have already been installed at prison facilities and corporate locations in the UK and USA.

You can visit our web site at www.scanna-msc.com for full specifications.

PRODUCT
LAUNCH**

SCANTRAK— portable x-ray screening for police, customs and EOD teams

We're pleased to announce the imminent launch of our new SCANTRAK portable x-ray unit.

SCANTRAK has been developed in direct response to customer demand for a portable version of our highly successful SCANMAX COLORSCAN x-ray units.

Designed to meet the needs of law enforcement agencies, the SCANTRAK has a wide range of applications including package and baggage inspection by police units, bomb detection and survey by EOD teams and narcotics and contraband detection by customs.

SCANTRAK offers

the user high quality, high resolution x-ray images in b/w and colour with additional options such as measurement, zoom and pseudo 3D. It also incorporates an extensive image archiving system.

Email us for more details.

New improved website

www.scanna-msc.com

If you haven't already visited our new web-site please take a few minutes to do so. You'll notice it's changed a lot since our original site and we hope you find it easy to use and navigate. We'd love to hear any comments or suggestions you may have.

For example, if you have anything you would like us to consider for inclusion on the site such as bomb incidents or any other relevant stories then please email me at kirstine@scanna-msc.com. Also, if there's anything you'd like to share with others who use or sell our equipment then again please let me know.

You can visit the site on www.scanna-msc.com

New success story — prisons

Did you know that we have sold over 500 SCANMAIL and SCANMAX units into prisons for contraband detection. Our equipment has been used to find narcotics, weapons, razor blades and other contraband brought or posted into prison facilities.

Applications include:

- Inmate mailscanning
- Magazine scanning
- Mobile x-ray scanning during cell searches (Scanmax 15)
- Visitor package scanning
- Library book scanning

Call us now to find out how SCANNA equipment can make your job easier for you.

"SCANMAIL did not miss a thing. Every test piece was detected in every mail item. The test pieces were detected with 100 % accuracy, as was a padded mailer with five magazines with the test pieces in the middle magazine, and a padded mailer with three paperback books inside".

"Staff members in the prison's mailroom noted that using SCANMAIL did not significantly increase their processing time for screening mail".

New applications

"As far as we're concerned, our SCANMAX equipment paid for itself in the first week we used it. We found a load of drugs coming into the prison and a big chunk of hashish in the heel of a boot"

Quotes from TECHBEAT, National Law Enforcement and Corrections Technology Centre.

New Single Replacement Board

SCANMAIL 10K continues to be the world's foremost letterbomb detector. As part of our ongoing commitment to product development we can now offer you single board replacement for the SCANMAIL 10K. Of course, all SCANMAILs still incorporate our unique reserve back up circuitry, so that customers have no operator downtime. This improvement follows on from the new lightweight cabinet successfully introduced last year.

New Wave of Corporate Terrorism

A new wave of animal rights and corporate terrorism world-wide means that target organisations should be looking to protect themselves against potential mail attacks.

Such organisations can find useful information on our web site on www.scanna-msc.com. In addition, our CHECKMAIL CD as a useful first step in learning about mailroom security procedures. At only £69 it is a highly cost effective training aid.

Recently targeted groups include:

- The Pharmaceutical Industry
- Animal Research Laboratories
- Food Companies (GM Foods)
- Dairies, Poultry Producers and Fish Farms
- Universities that carry out Animal Research
- Banks that finance animal research
