

SCANPRINT – PC based Scanmax Printer System

SCANPRINT is an accessory to the SCANMAX range of X ray cabinets

SCANPRINT can be used to print on screen images on the spot.

SCANPRINT is based on contemporary Windows software and is easy to use by Windows-familiar operators.

SCANPRINT images can be saved as files, sent by fax or email

SCANPRINT users can link to their own network and printer with assistance from their IT manager / network administrator

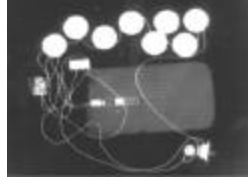

SCANPRINT includes PC Tower and basic printer. Software and a special frame grabber PCI card are installed ready for use
