

SCANNA

Scansilc 2430

High Resolution Ruggedised X-Ray System

SCANSILC 2430 is a new robust and compact x-ray panel for security, defence and light industrial x-ray applications. The panel is designed for security and EOD operators, is dust and water tight, impact and drop tested to 1m, yet weighs only 2.8 kg.

The imaging area is 233 x 300 mm and offers 16 bit, 76 micron high resolution images. The system is PB protected and designed for seamless operation with both pulsed and CP x-ray generators. Operates in sync mode with a direct cable [or wi-fi] connection to your generator and laptop or with the x-ray generator stand-alone in AED mode [Automatic Exposure Detection].

Highlighted Features

Best in class imaging quality of 76 microns/6.5 lp/mm

Uniquely designed for security applications - not a fragile medical panel in a protective cover

Synchronised control of the image panel and x-ray generator safely from the tablet/laptop without any additional bulky interface box, interface cables and connectors.

Multiple operational modes - Synchronised Cable, wireless and AED [automatic exposure detection]

Ruggedised Unibody design with no moving parts

Full IP67 protection against dirt, dust and water ingress. Withstands decontamination processes.

Impact and Drop tested to over 1m on all 4 corners

Unique load bearing weight of 170 kg

Small dead zone at bottom of panel of 7 mm
