

SCANWEDGE ULTRA

Lightweight. Rugged. Rapid Deployment X-Ray Panel.

The Scanwedge Ultra is a man-portable, rugged x-ray imaging system designed for defence and security professionals who need fast, reliable detection in challenging environments.

- Compact & Lightweight: With an 8 x 10" [20 x 25 cm] imaging area, Scanwedge Ultra easily slides behind objects close to walls and into gaps less than 1" thick.
- Robust Design: No moving parts or fragile glass components ensure maximum durability in the field.
- Simple & Fast Setup: The system comprises just three components – x-ray generator, imaging panel, and laptop/tablet – and can be operational in under 2 minutes.
- Flexible Connectivity: Operates via cable or Wi-Fi without the need for bulky control boxes.
- High-Resolution Imaging: The advanced high-sensitivity camera delivers clearer images for improved threat detection.
- Backpackable & Versatile: Perfect for suspect package checks in urban areas, C-IED operations, or any rapid deployment scenario.

Applications Include:

- IED/EOD and C-IED tasks
- Search and investigation operations
- Unattended baggage screening
- Detection of weapons, explosives, and hidden contraband

Technical Information

	Scanwedge Ultra
Image Area	8 x 10" [20 x 25cm]
Image Resolution	1280 x 1024 pixels
Panel Dimensions	59.3 [h] x 27.5 cm [w]
Depth at imaging area	1.9 cm
Depth at top camera zone	13 cm
Imager Weight	4.85 kgs [10.67 lbs]
